Our Story

Freenotes Harmony Park instruments

were originally developed by Grammy Award-winning musician Richard Cooke in 1995.

The idea came as a solution to the impediments of learning to play a traditional instrument and needing to read music. Cooke's experience of learning to play the flute in an improvisational style without taking any lessons or reading music was so profound, he wanted to teach others how they might experience this freedom of playing music instinctively. So many barriers of time, cost and talent were in the way of public exposure to music that he decided to create outdoor instruments that sounded so beautiful that everyone who started to play wouldn't want to stop.

Why Outdoor Music?

Watch as Richard Cooke, our founder, explains why he designed Freenotes Harmony Park instruments for outdoor use and enjoyment, in a new video viewable at: freenotesharmoniypark.com

The Original Freenotes Harmony Park | Moab, Utah

Established in 1995, the first installation of Freenotes in Moab, Utah's Rotary Park, is still being played today. This park is consistently rated in the national rankings for best park/playground.

Removing barriers to improvisational music training was the first step.

Everyone who has tried to play knows the anguish of having the music stop because a note goes wrong. Cooke decided to remove all of the wrong notes and sour tones. Then there were all those intricate finger movements that take years to master, they had to go too. He started to build xylophones that had no sharps or flats and were played not with the tiny muscles of the fingers, but with the large coordinated muscles of the arms and hands. The ergonomics of the instruments is an important factor.

He thought about putting instruments in the public spaces so anyone could play whenever they wished.

Fast forward to today, everyone can now share in the joy and freedom of playing music successfully.

Blending the Positive Power *of Music and Community*

A growing body of research confirms that experiencing music in nature positively engages the brain, builds social cohesion, and creates the conditions to build harmonious communities.

Research shows how music has positive effects on learning, memory, and our ability to experience pleasure. It helps us grow as caring and connected individuals and enables us to build more harmonious communities. We are also discovering similar psychological and physical effects from nature. Nature restores mental functioning in the brain the same way that water and food fuel our bodies. Like the muscles in the human body, the brain requires periods of rest and refueling. Overwhelmingly, the science is unequivocal: music stimulates the brain in a way that facilitates the cognitive function and neural connectivity necessary for healthy intellectual, social, and physical development.

PLAY SPACES

MOBILE LOCATIONS

PERFORMANCE VENUES

Thoughtfully planned and well-executed outdoor music environments benefit the whole community. They provide spaces to meet with others and share experiences together.

SIGNATURE DESTINATIONS

Sensory Therapy

Case Study:

Utah Schools for the Deaf and the Blind

Ogden, Utah

When designing a new facility for Utah Schools for the Deaf and the Blind, it was critical to address the educational and therapeutic needs of all students. Thoughtful consideration was given to the sensory, physical, social-emotional and developmental features of the new outdoor playspace. By offering multi-sensory features through various colors, textures, auditory sounds and movement experiences, the environment supports learning, independence, and confidence. The open courtyard serves as an experiential play area, complete with musical instruments designed to provide various sensations through touch, sound, and vibration. The new environment is a place where students can experience the joy of play with their friends, family, teachers, and therapists.

Thoughtful consideration was given to the sensory, physical, social-emotional and developmental features of the new outdoor play space.

Project Spotlight: The Elms Retirement Residence
Westerly, Rhode Island

"We're thrilled to support these installations that bring people together."

"Westerly-Pawcatuck just celebrated its 350th anniversary with a permanent visual and musical trail that makes downtown unique," said Guy Maiorano, founder and owner of The Elms, a privately-owned rental community for senior residents. "We're thrilled to support these installations that bring people together. With two mallets, two people can play together".

Yantzee

Swirl

Deluxe Ensemble

The **Deluxe Collection** is a mixed quartet of instruments with a variety of soothing sounds. This smaller, more affordable group of instruments still offers a diverse soundscape and is just as much fun as the larger collections.

Mounting

Project Spotlight: ImagineU Children's Museum
Visalia, California

"Outside play is important for children and at ImagineU Children's Museum we want to provide a variety of activities for all ages to enjoy," stated Katy Young, Executive Director. "Harmony Park combines outside play and creating music! You do not have to be musically inclined to enjoy this fun, hands-on activity. All ages love to play and make music in Harmony Park at ImagineU!"

"Outside play is important for children at ImagineU Children's Museum."

Tenor Tree

A musical forest comes alive with the 3-sided **Tenor Tree**. Ringing the green aluminum leaves creates bright, sustaining tones with a range of 12 notes divided into three harmonically pleasing chords. The anodized finish of the aluminum leaves are intentionally designed to create a natural leaf appearance that offers an aesthetic color contrast with the brown tree trunk. Three mallets are conveniently placed so 1-3 users can enjoy creating music together.

Music Inspires *Community*

Case Study: Dorrian Green | Columbus, Ohio

“Incorporating outdoor musical instruments along the pathways of **Dorrian Green** allows visitors of all ages and abilities to interact with each other, socialize, and enjoy the sculptural aesthetic of these harmonically tuned instruments.”

Tim Schmalenberger
MKSK Lead Designer
and Principal

Freenotes Harmony Park awarded MKSK Studios and the City of Columbus Recreation and Parks department the 2018 Award for Design Excellence for the creative usage of outdoor musical instruments in Dorrian Green. The park amenities include a sensory garden with outdoor musical instruments, a reading garden, butterfly and pollinator garden, and prairie garden consisting of plants native to central Ohio.

Lilypad Cymbals

The **Lilypad Cymbals** invite users to strike the multi-layered circular discs using 3 individual mallets. The bright, sustaining notes create a wave of pleasing sounds, inspiring dozens of note combinations. Up to 3 users can participate for even more fun.

Case Study: The Home Depot Backyard Mercedes Benz Stadium | Atlanta, Georgia

“The Home Depot Backyard is yet another example of the City of Atlanta and its vital partners’ commitment to West Atlanta.”

Kasim Reed
Mayor of Atlanta

Freenotes Harmony Park included three instruments in the Home Depot Backyard of Mercedes Benz Stadium mixed-use space. The Home Depot Backyard space provides areas for community events, entertaining and family activities as well as a tailgating zone on stadium game days. The instruments add a sculptural element to the Home Depot Backyard that mirrors the beautiful architecture of Mercedes Benz Stadium. “The Home Depot Backyard will serve as a gateway to Downtown, to our cultural district and to the world’s greatest sports venue, Mercedes-Benz Stadium,” Mayor Reed said during the press event. Outdoor musical instruments will enhance the multi-cultural, multi-generational community of the City of Atlanta and provide another fun element where families can come together.

Mercedes-Benz Stadium | Atlanta, Georgia

Harp

The graceful lines and sculptural silhouette of the **Harp** adds unparalleled beauty to any outdoor space. As users sweep both mallets across all 11 bright and sustaining chimes, gentle, soothing, angelic sounds can be heard, bringing joy to all listeners. Upright design invites players to create beautiful music from both sides.

Case Study:

Dr. Hayling Freedom Park | Saint Augustine, Florida

"The surrounding sculpture included tiles created by underserved youth with themes of compassion, peace, and diversity."

Joseph Segal
Local Sculptor

Compassionate **St. Augustine** commissioned the largest installation of Public Art in which their city has ever participated. Two sets of Contrabass Chimes were installed along with commissioned artwork that would complement the beauty of the marsh setting that is Dr. Hayling Freedom Park. "The surrounding sculpture included tiles created by underserved youth with themes of compassion, peace, and diversity," local sculptor Joseph Segal said of the project. The Chimes Project was initiated to recognize the civil rights struggle in St. Augustine and honor Dr. Robert Hayling. The Contrabass Chimes were chosen because they are stunning in both their towering appearance and low resonant sound while still being heavy duty to withstand the elements of St. Augustine.

Titan Tines

Introducing the newest and most architecturally inspiring piece we have ever designed – the **Titan Tines**, a stately and breathtaking sculpture that elevates any outdoor space with elegance and majesty. Dual arcs of melodious tuning forks span four octaves and emit both twinkling notes from below and deep, rich resonating tones from above.

Music Inspires *Independence*

Case Study:

Belle Plaine Elementary School | Belle Plaine, Kansas

“Music inspires independence, and encourages socialization and friendship.”

Jim Stambaugh

Former School teacher Jim Stambaugh knows a thing or two about music.

Both he and his wife Deanna were retired teachers from Belle Plaine Elementary School. Jim directed the musicals for school productions, and his wife was a Special Ed teacher who also taught music to her classes despite the fact that the school did not have a music teacher. Both Stambaughs believed that music was vital to every aspect of education.

Sadly, Deanna passed away a few years ago. Jim thought the best way to honor her memory would be to start a foundation to fund music for schools. What he didn't expect was that the foundation would not only raise enough money for a music area, but also a new playground. Now Jim enjoys introducing the students at Belle Plaine Elementary to the Freenotes sculptural and perfectly tuned outdoor instruments.

Tuned Drums

The **Tuned Drums** feature a distinctive Afro-Cuban influence similar to Congo Drums. This set of five drums can be played by hand, creating deep resonating beats that inspire movement and dance.

Available in two sizes - Adult or Toddler. Drums can be installed in any arrangement or layout.

Mounting Age Group Part Number

Adult TD-IG-N
Toddler TD-IG-T

Adult TD-SM-N
Toddler TD-SM-T

Adult TD-PM-N
Toddler TD-PM-T

To learn more about mounting options, see page 86.

Calypso

NEW!

The **Calypso** drum is both visually and harmonically reminiscent of island steel drums of the Caribbean, and inspires joy and the urge to dance whenever it is played. Constructed from 13 gauge stainless steel, the most robust in the market, the Calypso features tab limiters, unique in the outdoor market.

Calypso Drum shown with optional mallets. Sold separately.

Wee Mallets are not included, but can be purchased separately and easily installed.

Part#: CPSO-MA-PAIR-50WEE-24

Calypso Drum only available in iridescent Midnight Shimmer color.

Cadence

Deep vibrant tones ring clear on the **Cadence** marimba. Wide, coated fiberglass keys play sounds similar to a wooden instrument. With a recycled, reinforced plastic resonated base this instrument is a solid favorite. Also a favorite with musicians, this instrument inspires long improvisational play and tons of fun.

Imbarimba

The **Imbarimba** design combines elements of two African classic instruments, the marimba (a resonated xylophone) and the kalimb (a thumb piano). The coated fiberglass bars are entirely weatherproof, withstand hard use, and deliver the sound of a wooden instrument without the maintenance.

Music Inspires *Service*

Case Study: Clifton Hills Elementary School Chattanooga, Tennessee

A local Chattanooga service club had never shied away from any children's community service project, so when the opportunity came up to install a music park for the students at Clifton Hills Elementary school, they were all in. The objective was to place a music park close enough to the school so that teachers could access the instruments for outdoor music education, but also adjacent to the outdoor community soccer fields so that parents and youngsters could play the instruments while watching weekend soccer games. This new music park at Clifton Hills Elementary serves as a beautiful and enduring legacy to the vision and power of community service.

"The children are really enjoying the ability to play music in an outdoor environment."

Aria

The sleek, yet graceful **Aria** emits sounds like a delicate breath of fresh air. Lighter in sound volume, it is a great choice for environments with a lower volume requirement. The steel powder coated body is incredibly strong while the open design allows the Aria to naturally blend into outdoor landscapes.

Pegasus

The **Pegasus** spreads its wings in two keys, C Major and A Minor. A resonated metallophone made with anodized aluminum bars, the Pegasus creates bright and beautiful tones. This instrument resonates like a gong and has a sleek, classy style.

Music Inspires *Heritage*

Case Study: Coquille Park Playground
Madisonville, Louisiana

“It was amazing - upon the park’s grand opening, an impromptu jam session, with adults and kids alike, started almost immediately.”

Joseph Furr
ASLA- Landscape Architect

Inspired by the local history, culture, and industry of the New Orleans’ area, Coquille Park’s destination playground was designed to create something memorable and iconic for the ‘Big Easy’. Six outdoor musical instruments grouped along a meandering pathway replete with a musical staff and notes, invite parents and children to create their own impromptu ‘jam session’, emulating what has been done in jazz and blues clubs in the local region for over a century.

Music Inspires *Connections*

Case Study: The Harmony Trail

Westerly, Rhode Island and Pawcatuck, Connecticut

During a recent trip to La Porte, Indiana, Tim Lebling and his son Jude came upon an installation of outdoor musical instruments along the banks of Stone Lake. Jude was immediately enthralled with the lyrical sounds emitted from the instruments and asked his father, *"Why don't we have any of these awesome instruments in our hometown?"*

Tim wasted no time in researching the origin of these sculptural pieces, and quickly coordinated with businesses from both Westerly, Rhode Island, and Pawcatuck, Connecticut to help secure the installation of a variety of instruments that would be accessible to all residents of both towns that are uniquely connected by the Pawcatuck River. Local retailers, a law office, a brewing company, the Lions Club, and the Rotary Club of Westerly enthusiastically supported the purchase of 13 different Freenotes instruments.

“Why don’t we have any of these awesome instruments in our hometown?”

Jude Lebling
Age 5

In June of 2019, the town organized a parade designed to unveil each instrument along a path that they dubbed **‘The Harmony Trail’** that culminated in an evening Pops concert featuring Grammy award winners Richard Cooke and Paul Winter, and the Westerly Chorus being serenaded by the delightful accompaniment of Freenotes instruments.

The sound of *Quality*

Precision hand-cut Bars and Chimes

All bars and chimes are precisely and individually hand cut to size to reach the appropriate tuning, deburred so that there are no sharp edges or corners, and drilled at the nodes so that the maximum amount of sustain is achieved.

Resonators

Many of the instruments utilize quarter wave resonators which requires a plug strategically placed within the resonator. This allows each note of the instrument to obtain a uniform and lasting resonance.

Cable Lacing

Many of Freenotes Harmony Park instruments still utilize lacing cable as a method of attaching the bars or chimes to the instrument frame. Doing this gives the notes flexibility and resilience to sustain in all kinds of weather and conditions.

Mallet Cables

Mallets employ a 1/4" coated cable for attachment to the instruments, offering maximum playability while maintaining a secure connection. Cabling is composed of an interwoven stainless steel braid with a durable outer rubber coating.

Meticulous Quality Control Standards

All instruments are completely assembled from start to finish in the same factory. Customer care, engineering, and production crews work together closely to ensure a superior finished product by addressing customer concerns and running each instrument through a final inspection.

We Deliver Optimized, Sustainable & Reusable Packaging Solutions

Corrugated

We utilize 100% recycled corrugated material that is sustainably sourced and SFI certified.

Polyethylene Foam

Packaging designs utilize PE Foam made from 65% recycled content.

Reusable

Packaging materials are reusable and designed with multi-impact PE material, delivering better product protection against repeated drops.

Zero Landfill Waste

We engineer solutions capable of supporting sustainable closed-loop packaging ecosystems.

Mallet Variations

All mallets are designed to enhance the playability and sound for optimum delight. Pairing instruments with a specific hardness (durometer) of each mallet ensures the richest tone potential. Inclusive Mallets are sold separately upon request.

Mallet Holder (Triple)	MLT-HOLD-ASSM-3
Mallet Holder (Quadruple)	MLT-HOLD-ASSM-4

Definitions of Music Terms

SOPRANO	The highest pitch of the sound range.
ALTO	The second highest pitch of the sound range.
TENOR	Bass to mid range.
BASS	Deep low pitch sounds from the lower pitch of the sound range.
PENTATONIC HARMONY	A gentle and soothing five note musical scale. The nature of the scale makes it impossible to make any "wrong notes."
DIATONIC HARMONY	Sounds created using the C Major scale. Also known as the white keys on the piano.
Bell	Instrument that emits a musical ringing sound when struck.
Chime	An instrument with metal bars or tubes, that produce melodious tunes when struck.
Drum	A percussion instrument sounded by being struck with mallets or the hands. Typically cylindrical or barrel-shaped.
Marimba	Instrument consisting of a set of wooden bars, often with resonators beneath to reinforce the sound.
Metallophone	Any musical instrument consisting of tuned metal bars which are struck with mallets to create sound.

WARRANTY

Freenotes Harmony Park provides a limited warranty on outdoor musical instruments. These warranties cover damage due to failure or corrosion of metal parts that cause the product to become unfit for intended use. The warranty covers the life of the product as defined below and covers the product under normal use with proper maintenance at the original installation location. Instruments warranty will be voided if not installed in accordance with manufacturer's specifications.

Limited Lifetime Warranty

on metal upright posts used in supporting structure of frames and uprights against structural failure or corrosion of metal parts that cause the product to become structurally unfit for its intended use.

Limited 5-Year Warranty

HDPE components such as recycled plastic posts or instrument framework are covered under normal applications against splintering, decay, or fading that causes the product to become inadequate.

Aluminum parts like bars, resonators, and chimes are covered if there is a deficiency that causes the product to become structurally unfit for the intended use or affects the tonal quality of the instrument.

Powder-coated steel components such as steel posts and frames, are protected against damage due to failure or corrosion of metal parts that cause the product to become structurally unfit for the intended use.

Bar, chime, or cymbals are covered if failure due to breaking, shearing, and/or rust causes the product to become unfit for its intended use or affects the tonal quality of the instrument.

Outdoor music: sized for everyone

All Freenotes instruments with recycled posts can be installed at different heights, depending on the anticipated users. If a facility is accommodating preschoolers, installations at lower heights are more appropriate, while public parks might prefer that instruments be installed at standard heights to serve a wider audience of users.

Packaging and Installation Out of the box and ready to play

Freenotes state of the art packaging features custom cut foam inserts that keep instruments snug and secure during shipment. Because most products are pre-assembled in the factory, the actual installation of the instruments are quite easy. Most customers are anxious to play the instruments upon receipt of shipments, so simple to follow instructions are designed to make assembly quick and easy.

**Freenotes Harmony Park Products
are easy to specify...**

We are pleased to offer our full product line on CAD Details.

Material Specifications

Aluminum Bars, Chimes, and Resonators

All aluminum used on Freenotes instruments is custom extruded here in the USA. We use aluminum on areas of the instrument where capturing the tone is key. The aluminum is also anodized with an acid etched finish. While paints and plating sit on top of the surface of the aluminum, anodizing converts the outer layer of aluminum to aluminum oxide, so the coating is fully integrated with the aluminum substrate. Therefore, anodizing doesn't chip or flake like paint – it is completely integral with the underlying metal.

Fiberglass Bars

To meet the long-lasting expectations of every one of our instruments we use reinforced fiberglass in lieu of wood on our xylophones. Our fiberglass bars are composed of a vinylester resin mix that contains a UV inhibitor additive, a synthetic surfacing veil, and a 60% glass content, consisting of continuous filament mat and roving. These fiberglass bars provide a higher corrosion resistance for a longer life of play. Unlike wooden bars, our fiberglass bars will not rot or attract insects.

Plastic (HDPE) Components

Many of Freenotes instruments are constructed and built around HDPE (High-density polyethylene) frames. Our HDPE components are easily cleaned, graffiti resistant, scratch resistant, and will never swell or rot. They are also UV stabilized, so there is no need to ever paint after years of installation.

Structural Recycled Plastic Lumber

Recycled Posts are available as an option on many Freenotes Harmony Park instruments. Unlike wood, these posts will not splinter, rot, or degrade and are low-maintenance. This environmentally-friendly product is manufactured using recycled high-density polyethylene (HDPE) material that can also be recycled, and requires no painting or staining.

Stainless Steel Fasteners and Components

All fasteners used on our instruments are made of stainless steel. Stainless steel offers high strength and corrosion resistance properties, as well as a long-lasting flawless finish. You will also find stainless steel is used on our holsters that mount many of our instruments to their posts. This provides a rigid platform for a long-lasting installation. Both our lacing and mallet cables use internally woven stainless steel wires giving the flexibility needed for free movement playing experience as well as enhanced durability.

Powder Coated Steel Components

All Freenotes Harmony Parks steel posts and frames include a 3-step powder coat finish, which eliminates worry of corrosion and fading even in the harshest of environments.

FINAL STEP: Application of 3 mls of super durable TGIC Powder Coat

STEP 2: Application of 3 mls of Zinc-rich primer TGIC Epoxy Powder Coat

STEP 1: Sand blasted to nearly white finish to remove any imperfections

Original Raw Steel
